EVENT DESCRIPTION

La Galerie presents *Explorations*, an exhibition by French photographer Cyril Delettre. Cyril Delettre is an artist specialising in photography and videography. His work is a balance between documentary and art.

ABOUT THE ARTIST / ORGANISER

After studying economics at Paris University XII, Cyril Delettre changed his major to cinematography at ESEC and graduated in 1988.

He worked on several movies, then he started photography and joined the agencies Inrapress in 1989 and REA in 2002. He was working closely with multiple French politicians. His works were featured in important French magazines. Delettre has covered a myriad of society subjects such as the illegal immigrants, the closing of Sangatte, religious communities, and influential women in France.

He released a documentary "Objectifs de Campagne" about photo-reporters that followed the 2007 electoral campaign. Throughout these reportages, he showed the backstage of electoral campaign as well as the hard work of reporters.
